

Clamp it securely bonds the record to the platter, without the weight of a record puck which can stress the main platter bearing. You can adjust the downward pressure depending on the condition of your warped records. Clamp it is precision machined with diamond-cut bevels and a leather pad to protect the record label, Clamp it works with any platter spindle, threaded or smooth.

**Material:** aluminum with leather coating

**Diameter:** 78 mm

**Height:** 33 mm

**Weight:** 120 g

## Clamp it

Manual

1

Make sure the screw cap is loose and press it down to unlock the clamp mechanism.

2

Place Clamp it over the platter spindle with the record on the platter. Applying a small amount of downward pressure may help flatten some warped records.

3

Tighten Clamp it by turning the knob clockwise until it is snug. Do not over tighten! To remove, turn the knob counter-clockwise to loosen, then lift off the clamp.
