#### Printing or saving as PDF

You can print an on-line Primare user guide from your web browser, to provide you with a permanent copy to refer to away from your computer.

Alternatively, you can save a user guide as PDF files, to refer to when are you not connected to the internet.

To do so, simply choose **Print**, or **Print** followed by **Save as PDF**, from your browser's **File** menu.

For the specific procedure for each of the most popular web browsers see [How do I print or save a PDF copy of the on-user guides?](#)
