How to download apps from the WebOS App Store

In order to use the FVP features and for catchup TV you will need to download the catchup apps. Apps like Netflix, YouTube and Prime video are already installed but BBCiPlayer, ITVX, All4, My5 and UKTVPlay need to be installed.

 $(\underline{})$ Liso LGCh NO SUBSCRIPTION REQUIRED, NO HIDDEN FEES Then select the icon marked Sponsored Recent Input Apps -Recent Input TV Guide LG Channels Free TV Live TV 56 | The Yorkshire Vet 0 Ø App List (\Box) NETFLIX DBC itvX 5 video άtv

Once you have found the app you want click on it and then click Install

The installed apps will appear on the line of apps at the bottom of the home screen

You can also set the apps into the Quick Access Menu

If you enter for instance BBCiPlayer then press and hold the 0 button, then the Quick access edit will appear move the highlighted segment to the button you want to store it on (1-9) then click OK and the app will then be on that for quick access. Then to access it from anywhere press and hold the button for the app (so if you stored BBCiPlayer on 1 then press and hold 1 and the BBCiPlayer app will open. You can store up to 9 things in the quick access menu.
