# Manual: Argon Audio QUIET STORM

📄 Last updated on October 28, 2024 at 2:44 PM

## 1. Quick Start

### 1. Charging

With the provided USB cable, connect the headphones to a USB outlet.

The LED indicator will glow red while charging and will turn off once charging is complete.

It is recommended to fully charge the headphone before using it for the first time.

### 2. Power On and Pairing

Press the power button for 3-5 seconds until the LED starts blinking blue and red, indicating the headphone is powering on.

Additionally, the headphone will say "Power On."

It will then automatically enter pairing mode and announce "Pairing."

Open the Bluetooth settings on your playback device, locate "Argon Audio Quiet Storm" on the list, and select it.

When pairing is successful, the headphone will announce "Connected" and the LED will turn off.

### 3. Power Off

Press the power button for about 5 seconds until the headphone says "Power Off."

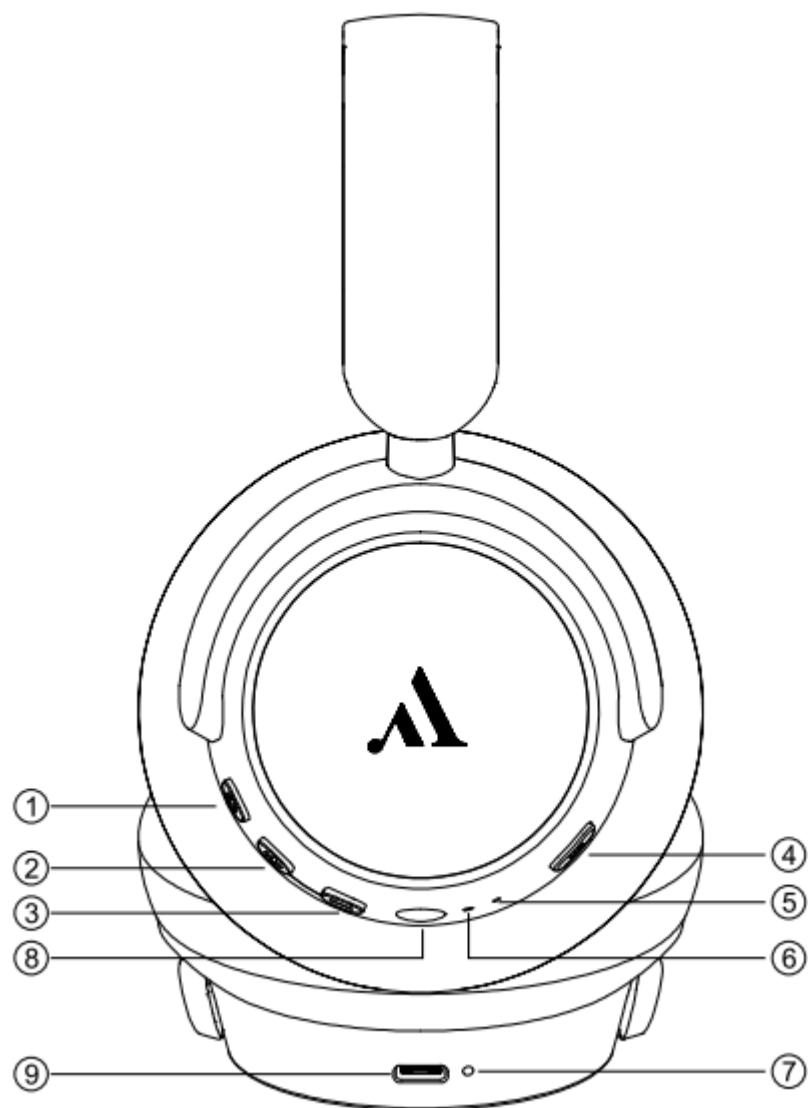

### 4. Switch Mode

To switch between ANC mode, Ambient mode, and ANC off mode, press the NC button.

---

## 2. Buttons and Indicators Overview
